

FY2014

**Centers for Disease Control and Prevention  
Vaccines for Children Program  
Value of CDC Vaccine Purchase by Recipient Jurisdiction  
Fiscal Year 2014**

The Vaccines for Children (VFC) program is a federally funded program that provides vaccines at no cost to children who might not otherwise be vaccinated because of inability to pay. The Centers for Disease Control and Prevention (CDC) buys vaccines at a discount and distributes them to grantees in states, cities, and territories of the United States—i.e., state health departments and certain local and territorial public health agencies—which in turn distribute them at no charge to those private physicians' offices and public health clinics registered as VFC providers. **About the Data**

\*The "Vaccine Purchase Value" is the value of vaccine purchased by CDC and ordered by providers in each recipient jurisdiction. These totals do not include associated internal CDC costs OR grant funding provided to those jurisdictions through the VFC program. Information on FY14 grant funding provided by CDC through the VFC program is available in the FY14 section of the CDC Grant Funding Profiles tool at <http://wwwn.cdc.gov/FundingProfiles/FundingProfilesRIA/>.
